

Mentor Program Planning Rubrics

KNEA has developed a set of six rubrics based upon the KSBE standards and criteria for Mentor Programs. Our work has been focused on the mentoring standards given the desire of many school districts to access the funds available for such programs. These rubrics are intended to guide planning committees in the development of programs that meet or even exceed the minimum standards established by the KSBE.

The first column of each rubric lists the criteria adopted by the KSBE. The second column reflects unacceptable practices that would likely jeopardize funding from the KSBE. The third column contains recommendations from KNEA related to the KSBE criteria, consistent with KNEA criteria, and based on a review of successful teacher mentoring programs throughout the country.
